## 1. Storage

The storage ambient for the LEDs should not exceed 70\% relative humidity.
LED 70\%

It is recommended that LEDs out of their original packaging are used within three months.
LED
It is recommended that LED be used in 168 hrs after opening the package If extended, use $70 \quad 5$ before baking more than 12 hrs
LED 168hrs

## 2. Precautions in handling:

- When soldering, leave 2 mm of minimum clearance from the resin to the soldering point. 2 mm
- Dipping the resin to solder must be avoided.
- In soldering, do not apply any stress to the lead frame particularly when heated.
- When forming a lead, make sure not to apply any stress inside the resin.

## 3. Peak Forward Current:

Condition for is $I_{\text {FP }}$ pulse Pulse Width $\leq 100 \mu \mathrm{~s}$ and duty $\leq 1 \%$.
