

LG-03PT4D94H-302C-B PHOTO TRANSISTOR DATA SHEET

 SPEC. NO.
 :
 SZ20071702

 DATE
 :
 2020/07/17

 REV.
 A/0

Part No.	LG-03PT4D94H-302C-B	Page	1 of 9

LIGHT

Features

- Pb free product RoHS compliant
- High PhotoSensitivity
- General purposkeads
- Reliable and rugged
- Long life solid state reliability

Package Dimension

Notes:

- 1. All dimensions are in millimeters
- 2. Tolerance ist0.20mm unless otherwisenoted.
- 3. Protruded resin under flange1is0mmmax
- 4. Lead spacing is measured where the leads emerge from the package.
- 5. Specifications are subject to change without notice.

Part No. LG-03PT4D94H-302C-B

LEAD FORMING PROCEDURES

1. Maintain a minimum of 2mm clearance between the base of the Lens and the first lead bend (Fig.5 and Fig.6)

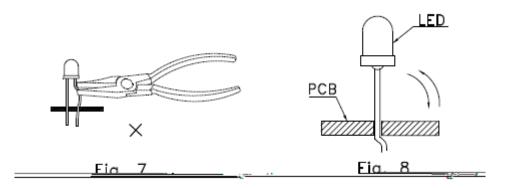

2. Lead forming or bending must be performed before soldering, never during or after soldering.

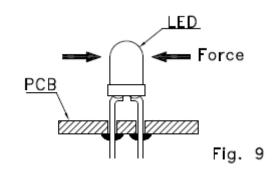

3. Do not stress the LED lens during leafdrming in order to fractures in the lens epoxy and damage the ternal structures.

4. During lead forming, use tools or jigs to hold the leads securely so that the bending force will not be transmitted to the LED lens and its internal structures. Do not perform lead forming once the component has been mounted onto the (FOgB7).

5. Do not bend the leads more than twic(Fig.8).

6. After soldering or other hightemperature assembly, allow the LED to cool down to c50 before applyingoutsideforce (Fig.9). In general, avoid placing excess force on the LED to avoid damage. For any questions please consult with LIGHT representative for proper handling procedures.
